Education

Wilfrid Laurier University

Bachelor of Science (Computer Science)

Sep. 2024 – Present

Major GPA: 11.89/12

Technical Skills

Languages: C, HTML/CSS, Go, Java, Javascript, LaTeX, Lua, Luau, Love2D, Markdown, MATLAB, Python, R, SQL, Typescript, VBA

Software & Tech: AdobeXD, Audacity, Blender, Canva, Excel/Google Sheets, Git, Github, Krita, MongoDB, MuseScore Studio, Node.js, Overleaf, paint.net, Roblox Studio, Vercel, Vite, VSCode

Notable Projects

🔗 Visulie | Luau, Roblox Studio, Krita

2021 – Current

- Developed the first of its' kind animation plugin on Roblox's marketplace, generating **over 150 sales and over \$1,500 CAD in revenue** by building an intuitive, user-facing editor, serialization pipeline, and runtime interpreter for real-time multi-property playback.
- Actively ranked #1 on Google Search**, increasing plugin visibility and outreach through marketplace optimization and community engagement.

🔗 FPS | Luau, Roblox Studio, MuseScore Studio

2023

- Created a simulator style game that features progression through upgrading equipment, amassing **over 100K total experience visits** and **over 100 CCU** through interactive gameplay mechanics, balancing, and front-end visual design.

🔗 Pocket Rift | Luau, Roblox Studio, Krita, MuseScore Studio

2019 – Current

- Engineering a fully original solo indie game; combining elements of simulation, RPG, and pieces of various microgenre, as well as featuring a diverse set of interdependent game mechanics to deliver unique, emergent gameplay for players.
- Implemented robust, extensible, and modular game mechanics by building scalable architectures and frameworks, enabling complex player interaction and expression whilst ensuring maintainability.
- Worked with expertise across programming, project design, UI/UX, music, arts, and many others, creating feature-rich gameplay while enabling the development of multidisciplinary skills.

🔗 sys.break() | Luau, Roblox Studio

July 2025

- Worked with a team for the three-day Roblox Developer Challenge 2025, “Break the System”, by leading programming efforts and designing a terminal-style, text-based RTS interface, delivering an immersive, real-time strategy experience.
- Built responsive user interfaces that dynamically adapt to various device specifications, increasing cross-platform accessibility and player engagement.

Extracurricular Activities

Music: Piano, Flute, Guitar

Athletics: Intramural, Cross Country, Track and Field, Weight Training

Creative: Game Design & Development, Musical Composition, Digital Art, UI/UX Design, Website Design

Work & Volunteer

Freelance/Contract Gameplay Programmer

2022 – Present (Variable Hours/Week)

Systems & Mechanics

Virtual

- Designed and implemented various gameplay systems, such as incremental gathering systems, optimized network handing, scripted visual effects, and modular mob behavioural systems.
- Delivered a complete, playable product within deadlines while maintaining clear communication and iterating based on feedback.

TSCAC

2023 – 2025 (24 Weeks, 20h/week)

Youth Summer Camp Counselor

Toronto, Ontario

- Led, supervised, and taught groups of up to 40 campers, maintaining and encouraging safe and enjoyable participation through carefully designed games, graphics, and crafts.
- Improved scheduling and communication through usage of spreadsheet software to compile logistics and camper feedback, promoting future improvement via analytics.
